EDUCATION

Galgotias University

Bachelor of Technology; CGPA: 9.38

Greater Noida, India

August 2022 - July 2026

SKILLS SUMMARY

AI / ML: Explainable AI (XAI), SHAP, LIME, RAG, Prompt Optimization

Languages: Java, Python, SQL

Frameworks: Spring Boot, Angular, REST APIs

Web Development: HTML5, CSS3, Bootstrap

Tools & Testing: Postman, Selenium, Git, Framer, Firebase

Core Subjects: Computer Networks, DBMS, Operating Systems

PROJECTS

Explainable AI for Clinical Decision Support in Heart Disease Prediction [Link](#)

2025 - 2026

[Python, XAI (SHAP/LIME), Stacked Ensemble Approach]

- Designed a clinical decision support system that predicts heart disease risk with above 90% accuracy using a stacked ensemble approach combining multiple base models.
- Integrated Explainable AI (XAI) techniques to interpret model predictions, helping medical practitioners understand the key features driving each diagnosis.
- Performed data preprocessing, feature engineering, and hyperparameter tuning on a real-world cardiovascular dataset to boost reliability.
- Evaluated model performance using accuracy, precision, recall, F1-score, and ROC-AUC to ensure robust and trustworthy results.

Online Garbage Reporting System [Link](#)

March 2025 - April 2025

[HTML, CSS, Firebase]

- Developed a web app where users can report garbage issues by submitting text and image-based complaints.
- Implemented user login and registration using Firebase Authentication.
- Created separate user and admin views to manage and track complaint updates.
- Improved user experience by handling form submissions asynchronously with JavaScript, avoiding full page reloads.

Spring-CRUD API [Link](#)

July 2025

[Java, Spring Boot, SQL]

- Developed a Spring Boot REST API to manage students using MySQL and JPA.
- Followed 3-layer architecture (Controller, Service, Repository) using Spring Data JPA.
- Implemented 4 operations (SELECT, INSERT, UPDATE, DELETE) for handling user data in a MySQL database.
- Tested all endpoints using Postman to validate request/response flow.

ACHIEVEMENTS & CERTIFICATES

Web Full Stack Developer Internship [Link](#)

Oct - Dec 2024

- Learned to create responsive web pages using HTML, CSS, and Bootstrap.
- Gained hands-on experience in writing JavaScript for interactivity and using Node.js for server-side logic.
- Built mini-projects to understand the structure of full stack applications.

EXTRACURRICULAR

- Runner-up at Smart India Hackathon (SIH) 2024.
- Explore tech as a bridge between innovation and human well-being, with a strong interest in AI for healthcare.
